

1. The first step is to identify the problem. In this case, the problem is that the wheat is not growing well. The second step is to determine the cause of the problem. The third step is to develop a plan to solve the problem. The fourth step is to implement the plan. The fifth step is to evaluate the results of the plan.

2. The first step is to identify the problem. In this case, the problem is that the wheat is not growing well. The second step is to determine the cause of the problem.
